PROFILE

Software Engineer with over 4 years of experience in web and software development. Skilled in problem-solving, collaborating with teams, and adapting to new environments. Confident in my ability to learn quickly, contribute innovative ideas, and deliver results in dynamic development roles.

WORK HISTORY

Software Developer   *Jan 2025 – Present*

KoladTech Company   *(Remote)*

- Developing scalable web applications using ASP.NET, C#, Blazor and Firebase
- Integrated authentication and access control measures, enhancing system security.
- Collaborating with teams to develop dynamic user-friendly features and real-time functionality.

Technology Support Engineer   *Jan 2024 – Nov 2024*

SystemSpecs Group   *Lagos, Nigeria*

- Maintained and enhanced the company's productivity web application, increasing departmental efficiency by 25%.
- Cleaned and optimized the database for the productivity application, boosting project efficiency by 30% and reducing query times.
- Tested and evaluated a new AV solution, ensuring seamless integration with organizational technology and strengthening cybersecurity defenses.

IT Intern   *July 2021 – May 2022*

Federal Capital Development Authority (FCDA)   *Abuja, Nigeria*

- Collaborated with a development team to design a responsive web app for employee registration and data management, streamlining staff information retrieval by 40%.
- Configured and maintained network and server connections, achieving 99.9% uptime and ensuring uninterrupted internet connectivity for over 500 users.

EDUCATION

Bachelor of Engineering (B. Eng. Computer Engineering)   *Jan 2018 - Oct 2023*

University Of Ilorin, Ilorin, Nigeria

WAEC Secondary School Certificate / High School Diploma   *Sep 2011 - May 2017*

Zamani College, Kaduna, Nigeria

PROJECTS - 🌐 View more of my recent work on my [portfolio website](#)

🔗[Charity Website](#) | Next.js, React, Firebase, TailwindCSS

- Built a full-stack charity platform with fundraising, volunteer registration, and project showcases.
- Integrated Firebase Firestore for real-time data management.
- Deployed with Docker on a VPS, ensuring scalability and reliability.

Event Planner WebApp | Python, Javascript, Django, Flask, Sqlite, Bootstrap

- Developed a web app for event creation, management, and RSVP tracking using Django and SQLite.
- Implemented secure authentication and designed responsive layouts for seamless user experience.

🔗[BeepR - Chat App](#) | Python, Javascript, Flask, Sqlite, Websockets

- Led a team in creating a real-time chat app supporting over 500 concurrent users using Flask-SocketIO with features like live messaging, read receipts, and room management.
- Designed a responsive UI for dynamic messaging, friend requests, and secure SQLite-based data storage.

PROFESSIONAL CERTIFICATIONS

Harvard's CS50w (Web Programming with Python and JavaScript) | *2025*

Harvard's CS50x (Introduction to Computer Science) | *2022*

SKILLS AND PROFICIENCIES

Core Competencies   Soft skills

Programming Languages: JavaScript, Python, C#   Problem-Solving

Web Framework and libraries: NextJS, React JS, Django, Flask   Teamwork

Database Management: Sqlite, MySql, firebase   Adaptability

Version Control: Git, Github   Attention to Detail

Software Development Methodologies: Agile(Scrum),   Collaboration

Continuous Integration/Continuous Deployment (CI/CD)   Open-Mindedness

Others Tools: Visual Studio Code, Visual studio, Docker, FileZilla
